Thanks for checking out Kumu! You're one step away from access to the world's best platform for visualizing relationships.

Already have an account? [Sign in](#)

By signing up, you agree to Kumu's [terms of service](#) and [privacy policy](#).

Step 2: Email your Kumu username to Amy Schulz at abagschulz@gmail.com to be added to the Education Futures organization in Kumu. After you are added to the organization, you will be emailed a notification from Kumu.

Step 3: After you are added to the Education Futures organization in Kumu, you can start populating the map template. Add your college or region name to start your map.

Education Futures Mapping Project

Welcome Education Futures participants!

Kumu is a collaborative, web-based platform for creating interactive ecosystem maps. We've partnered with California Community Colleges to support the Education Futures Teacher Preparation Pipeline ecosystems projects.

Please enter your college name and click the button below to create your Teacher Preparation Pipeline Ecosystem Map. It may take a minute or two for your project to be prepared.

CREATE PROJECT

Step 4: A demo map has been started, but you can change the entries and add to them.

The screenshot shows the Kumu platform interface. On the left, there is a sidebar with a heading "Example: Adding your first elements" and a list of four steps: 1. Click the green "+" sign to add an element. 2. Name the element. What is the name of the organization or individual you've added? 3. Add an element type. We've predefined a couple element types for you to add. 4. Now, add other information you think is relevant to that element. You might try adding "Category" or "Data type" or "Proximity." Below the list is a "Next steps" section. The main area displays a network map with nodes labeled "Demo Org 1" through "Demo Org 6" and "Demo College 1". A legend titled "Education Futures TPP Template" lists element types: Community College (blue circle), Partner Organizations (green circle), Other Higher Ed Partners (purple circle), Sector (yellow circle), Strategic Program Components (orange circle), and Target Student Populations (red circle). It also shows line styles for "Strong", "Developing", and "Potential" connections. A dropdown menu at the top right says "Use the dropdown below to filter by organization type" with "Select a type" below it. At the bottom right, there are icons for search, edit, and a table view icon (a grid). A red arrow points to the table view icon.

Step 5: To switch to table view to populate your map, click on the table icon in the lower right hand corner.

Step 6: In table view, click on fields to populate.

Filter...

	Label	Type	Tags	Description
1	Demo Partner Org 6	K-12 Institution		
2	Demo Partner Org 2	Government		
3	Demo Partner Org 4	Community-based Organization		
4	Demo Partner Org 1	Community-based Organization		
5	Demo College E	Community College		
6	Demo College A	Community College

Example: Adding your first elements

Here are a few example elements we've added to get you started. Elements in Kumu can represent individuals or organizations that are a part of our ecosystem. Try the following steps to get comfortable working in Kumu:

1. Click the green “+” sign to add an element.
2. Name the element. What is the name of the organization or individual you've added?
3. Add an element type. We've predefined a couple element types for you to add.
4. Now, add other information you think is relevant to that element. You might try adding “Category” or “Data type” or “Proximity.”

Next steps

Use the dropdown below to filter by organization type
Select a type

Education Futures TPP Template

- Community College
- Partner Organizations
- Other Higher Ed Partners
- Sector
- Strategic Program Components
- Target Student Populations

— Strong
- - - Potential

Click the labels below to cluster

STRATEGIC PROGRAM COMPONENTS TARGET STUDENT POPULATION SECTOR

Step 8: If you have questions about the map or ecosystem development, please contact Amy Schulz at abagschulz@gmail.com to schedule a call.
